Issued at: 27th September, 2024.

## PROJECTS

### Connect — *Social media platform* (Aug 2024)

[Website](#) • [GitHub](#) • Laravel, JavaScript, CSS, PostgreSQL, Docker, Render

Connect is a lightweight social networking platform, inspired by Facebook, where users can connect, share, and interact with each other. Whether it's posting updates, following friends or liking and commenting on posts.

### Moodmix — *An AI Powered playlist generator* (Aug 2024)

[Website](#) • [GitHub](#) • React JS, TailwindCSS, GCP

MoodMix is an innovative platform that generates personalised Spotify playlists based on users' moods. Users describe their current feelings, and the app uses this input to create a custom playlist tailored to their emotional state. Whether feeling happy, sad, or relaxed, MoodMixProject creates the perfect soundtrack for any mood, offering a unique way to connect with music and emotions.
